

Truck Equipment Automotive Electrical Technicians

Full time: Four 10-hour shifts

Location: 591 Chester Road, Delta, BC

Commercial Truck Equipment is Canada's largest, most stable, and most diversified company serving the work truck industry, the utility industry, and the emergency equipment industry. Since 1947, we continue to provide unmatched job security and a comprehensive list of employee benefits. More than 30% of our team are long-tenured employees with over 15 years of service; evidence of strong employee/employer relationships, effective teamwork, and the benefit of an open-door policy. As Commercial continues to grow and diversify, we are looking for qualified and committed people to join our team. If you are interested in working in a safe, healthy, and collaborative environment with a great team of colleagues, please reply to the contacts in the listing below.

Employee benefits include competitive compensation, medical benefits, dental benefits, life insurance, long term disability, short term disability, company-sponsored matching RRSP plan, profit sharing, boot allowance, tool allowance and replacement program, PPE, training and apprentice opportunities, as well as the opportunity for exceptional career growth.

Overview

To install components and systems associated with utility vehicles including CMVSS lighting, traffic warning systems, work lights, emergency lights, compartment lights, inverters/generators, and associated AC wiring, exterior video systems, remote throttle and start/stop, and other job-related equipment on utility vehicles and truck equipment. To complete this work, you are expected to read build diagrams and electrical schematics.

Key Competencies

- Install related equipment onto vehicles and equipment
- Install electrical wiring, connect electrical fittings, drill holes, and perform all tasks associated with modifying vehicles for related equipment
- Design and manufacture harness assemblies and sub-assemblies that are vehicle specific
- Develop wiring routes throughout the vehicle to provide for the most efficient wiring path and to enable future placement and/or troubleshooting
- Troubleshoot and diagnose problems with all vehicles & equipment

Qualifications

- Ability to read electrical schematics
- Knowledge of DC and AC electrical systems
- Knowledge and understanding of electronics theory, including the specific colors and color codes associated with wiring
- Mechanical skills & ability to modify interior of vehicles without damaging vehicle or equipment
- Experience with vehicle programming
- Experience working on utility vehicles and truck equipment is considered an asset

The ideal candidate should have a proven track record of employment, ideally in a similar industry, a full driving license, a desire to work to a high quality with an understanding of customer service and satisfaction, and be self-motivated. Training and product familiarization will be provided to the successful candidate. We thank all who apply, however, only those who are qualified for the position will be contacted.
